Chapter 1

Why Nabd?

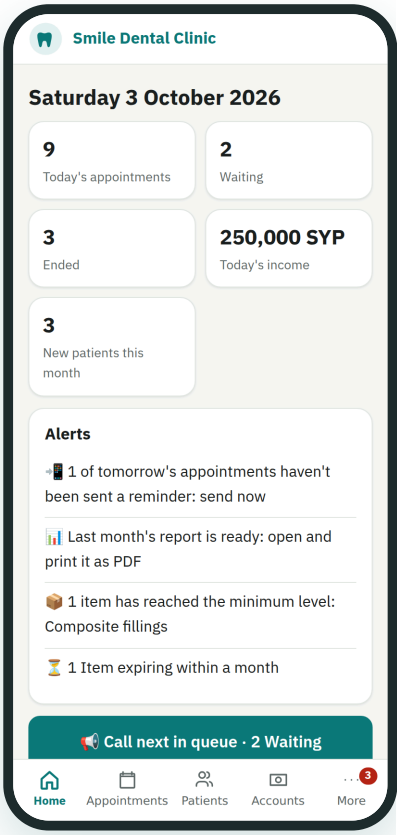

Nabd is an all-in-one platform for managing clinics and medical centers of every specialty. It brings appointments, medical records, prescriptions, accounts and inventory together, with a dedicated app where patients follow their appointments and medicines.

Who is Nabd for?

- **Solo clinics:** one doctor with a receptionist.
- **Shared clinics:** several doctors in one clinic, each with their own appointments and patients.
- **Medical centers:** several specialties, doctors and staff under one management.

Where does it run?

- **Android app** downloads from a direct link or QR code.
- **iPhone:** open the site in Safari and add it to the home screen to use it as an app.
- **Computer:** any browser, with a wider layout for reports and tables.
- All devices are **synced in real time**: whatever the receptionist enters appears for the doctor instantly.

Doctor's home screen

Supported specialties

Dentistry · **Obstetrics and gynecology** · **Pediatrics** · **Dermatology and cosmetics** · **Internal medicine** · **Cardiology** · **Orthopedics** · **Physiotherapy** · **Ophthalmology** · **ENT** · **Urology** · **Psychiatry** · **Nutrition** · **General practice**

Each specialty has its own **module** that appears in the patient file automatically: dental chart and treatment plan, growth charts and vaccines, pregnancy follow-up, vital signs for chronic conditions, eye exams, and physiotherapy sessions.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

☆ Highlights of the Nabd app

Medical care

Complete medical record

Visits, prescriptions, tests and images, with allergy alerts.

Ready prescription templates

By diagnosis, per the latest international protocols and guidelines.

Drug education and smart assistant

Patients and appointments

Appointments and queue

Daily schedule, no double booking, queue numbers and a waiting-room screen.

Patient app

Complete medical record, appointments, medicines, reminders and messaging with the clinic.

WhatsApp in one tap

Appointment reminders and outstanding-payment collection with ready messages.

Clinic management

Accounts

Payments, receipts, outstanding payments, expenses and net profit.

Reports

Monthly PDF report compared with the previous month.

Inventory

Low-stock and expiry alerts, with automatic deduction of supplies.

International standards and security

ICD-10 coding

Diagnoses coded with the International Classification of Diseases; drugs by generic name.

Public booking page

A link to your clinic where new patients book without an account.

Privacy and security

Fine-grained permissions; reception cannot see medical data.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 2

Getting started: from download to first login

Your clinic is ready in minutes. This chapter explains downloading the app, trying the demo clinic, creating your clinic and how every account logs in.

Downloading the app

1. **Scan the QR code or open the download link**
   The page detects the phone type automatically.
2. **Android**
   The app file downloads directly. During installation, your phone may ask you to allow installs from this source; approve it once.
3. **iPhone**
   Simple instructions appear: tap the Share button in Safari, then “Add to Home Screen”.
4. **Computer**
   Open the site in any browser; it can be installed as an app from the address bar.

Download the app

Platform website

Try the demo clinic first

Before creating your clinic you can try everything in a **ready demo clinic** with 26 patients, today's appointments, two months of payments, a dental chart, prescriptions, requests and messages.

- On the login page tap **“Try a demo clinic without an account”**, or scan the code beside it.
- In the top bar choose the role to try: **doctor, receptionist, nurse, accountant or patient**.
- Everything you do is saved only on your device and affects no one else. You can restore the original data with the “Reset data” button.

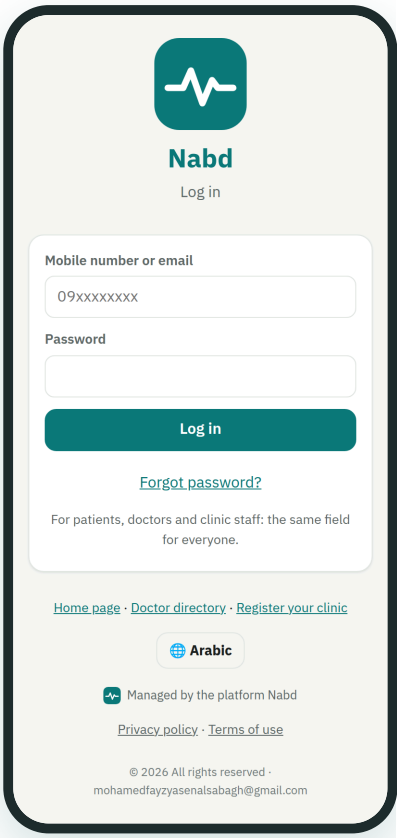

Demo clinic

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Data refreshes daily so today's appointments always fall on today's date.

Create your clinic

1. **Tap “Start free trial” (14 days)**
   From the platform home page, or from the sign-in page → “Register your clinic”.
2. **Clinic details**
   Clinic name, specialty, city, short link in Latin letters (shown in the booking page link), clinic phone and address.
3. **Lead doctor details**
   Name and title, mobile number, email and password (for login).
4. **Listing in the doctor directory**
   Optional, so new patients can find you and book from your page.
5. **Agree and create the clinic**
   The clinic is activated immediately with all features for 14 days, no payment card required.

Unified login page

Login: one page for everyone

All accounts log in from **the same page**: doctor, receptionist, nurse, accountant and patient. No clinic code or account type is needed; the app recognises the account and its clinic automatically.

Account	Signs in with	Notes
Lead doctor	Email and password	Can recover their password via a link sent to their email.
Doctors and staff	Mobile number and password	They get a temporary password from the admin and must change it at first login.
Patient	Mobile number and password	Receives a temporary password by WhatsApp when registered at the clinic.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 3

Clinic setup

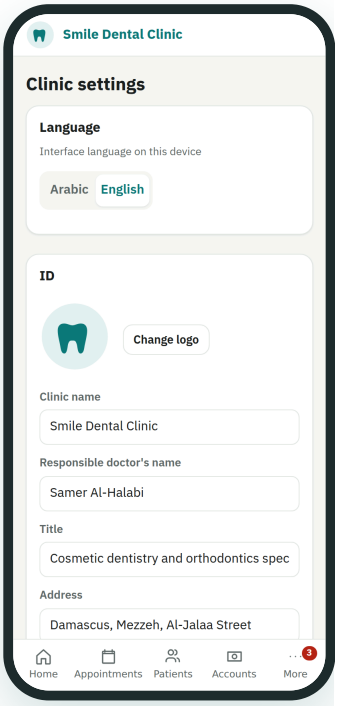

From “More → Clinic settings” the lead doctor sets the clinic identity, working hours, services and prices, and everything shown to patients and on printed documents.

Branding, letterhead and footer

- **Logo:** a photo from your phone or the default specialty logo.
- **Clinic name, doctor name and title:** shown at the top of every printed page.
- **Address:** shown in the page header and in reminder messages.
- **Phone and email:** shown in the footer of printed pages.
- **Interface colour, currency and map location link.**

Specialty and modules

Choose the specialty and its module appears in the patient file. On the **Medical Centers plan** several specialties can be enabled, **and each doctor has their own specialty**.

Clinic settings

Working hours and services

- **Working days and hours** for each day; booking only within them.
- **Default appointment length:** from 10 minutes to one hour.
- **Services:** name, price and duration of each service; the price fills in automatically at payment.
- **Consent text:** signed by the patient in their app before the procedure.
- **Prescription footer note:** a fixed line printed on every prescription.

Booking page and doctor directory

- **Public booking page:** a link and QR code where any patient books without an account.
- **Showing prices** on the booking page is optional.
- **Doctor directory:** so patients find you by specialty and city.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 4

Team and permissions

From “More → Team”, the administrator adds doctors and staff. Each account has fine-grained permissions that protect patient privacy.

Add an account

1 Tap “+ Doctor” or “+ Staff”

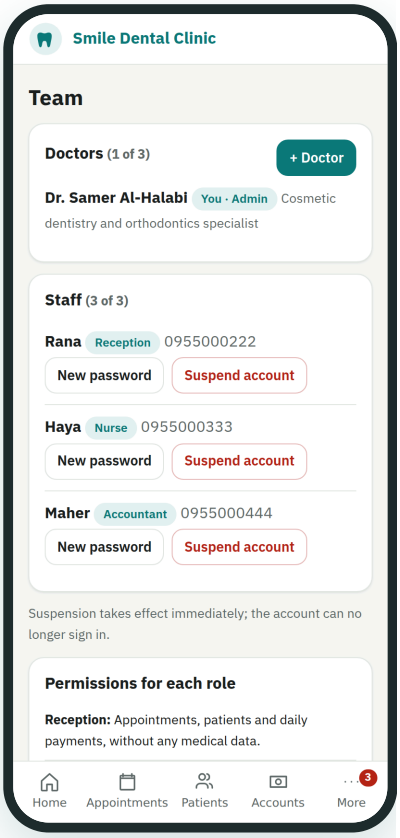

Enter the name and mobile number; for staff choose the role: receptionist, nurse or accountant.

2 Send the sign-in details

A temporary password appears with a “Send via WhatsApp” button that sends a ready-made message including the app link.

3 First login

The staff member is asked to change the temporary password.

Team page

Managing accounts

- **New password:** for anyone who forgot theirs; the old one stops immediately.
- **Deactivating an account:** takes effect immediately; the account can no longer sign in.

Permissions table

Feature	Doctor	Receptionist	Nurse	Accountant
Appointments, queue and waiting-room screen	✓	✓	✓	✓
Registering patients and their details	✓	✓	✓	✓
Daily payments and receipts	✓	✓	✓	✓

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Feature	Doctor	Receptionist	Nurse	Accountant
Medical record: visits, prescriptions, tests	✓	—	View	—
Recording vital signs	✓	—	✓	—
Writing visits, prescriptions and medical documents	✓	—	—	—
Doctor's private notes	✓	—	—	—
Accounts for any period and outstanding payments	✓	—	—	✓
Clinic expenses and net profit	✓	—	—	✓
Medical reports and statistics	✓	—	—	—
Settings, team and subscription (admin only)	✓	—	—	—

Center doctors board: shown to the center owner on the home page. For each doctor: number of patients, today's appointments, those waiting, those done, and the queue number being seen now. Tap a doctor to see their appointments.

Multi-specialty centers: use “Edit specialty and title” next to each doctor to set their specialty. They then get the prescription templates of their specialty, their specialty and title are printed in their page header, and the center appears in the doctors directory under all its specialties.

The number of doctors and staff depends on your plan: Basic allows one doctor and one staff member, Professional up to 3 doctors and 3 staff, and Medical Center is practically unlimited.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 5

Patients

The patient list is sorted by name with quick search by name or number. Each patient has a file that gathers everything about them.

Registering a new patient

1. **From “Patients” tap “+ New patient”**
   Name and mobile are required. For many patients at once: “📥 Import from Excel”.
2. **The system creates a patient account automatically**
   With a temporary password shown only once.
3. **Send it via WhatsApp**
   If the mobile belongs to the patient's guardian (a child, for example), tick “This mobile belongs to the patient's guardian” and the message starts with “Hello, guardian of patient” and the patient's name. The message ends with the clinic's name and “We wish you a speedy recovery”. A ready message starting “Welcome to the Nabd app” includes the download link, mobile number and password.

If the number already has an account at the clinic (for example, a mother registering her second child), the new file is added to the same account, and the patient chooses the file when signing in.

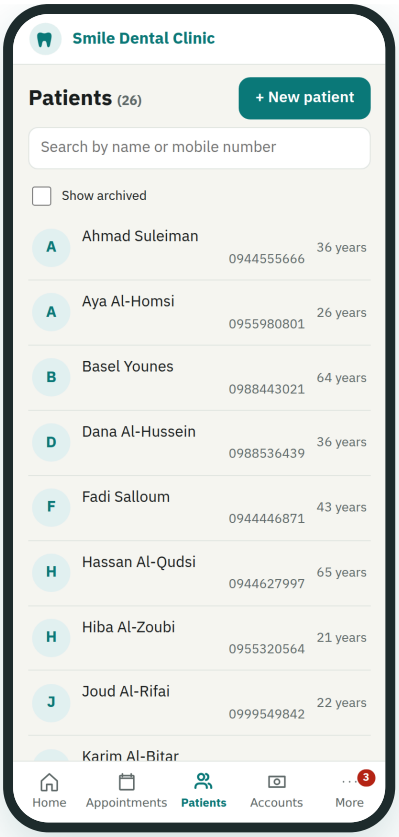

No account? Choose “Don't create an app account now” and the mobile becomes optional; create the account later from “Account → Create patient account”.

Wrong mobile number? From the patient file → “Account” → “Change mobile number”: the account and full record move to the correct number, the old one stops, and a new password is issued. No need to delete and re-register the patient.

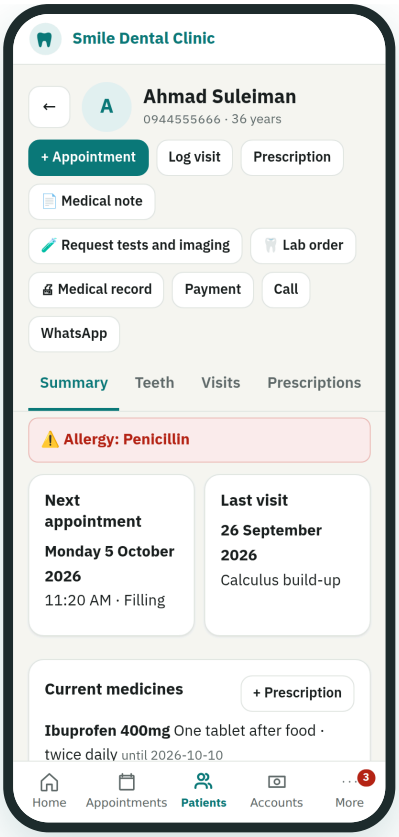

In the patient file

At the top of the file are quick buttons: **appointment, record visit, prescription, medical document, lab & imaging request, patient file, payment, call, message**. Below them are tabs according to permissions.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Patient list

Patient file

Tab	Content
Summary	Smart summary, red allergy alert, next appointment, last visit, current medicines, medical history and smoking.
Specialty module	Teeth, growth and vaccines, pregnancy, vital signs, vision, sessions... depending on the clinic.
Visits	Complaint, examination, diagnosis and treatment, with a printable visit report.
Prescriptions	All previous prescriptions, with reprinting.
Tests and files	Lab results with values, plus images and documents (uploaded by the doctor or the patient).
Private notes	Doctors only; not shown to the patient or staff.
Appointments, accounts and messages	The patient's appointments, payments and balance due, and their chat with the clinic.
Account	Reset the patient's password and archive the file.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 6

Appointments, queue and waiting-room screen

The appointment schedule is built from working hours and appointment length, and prevents double booking automatically. From arrival to the end of the visit, every step is one tap.

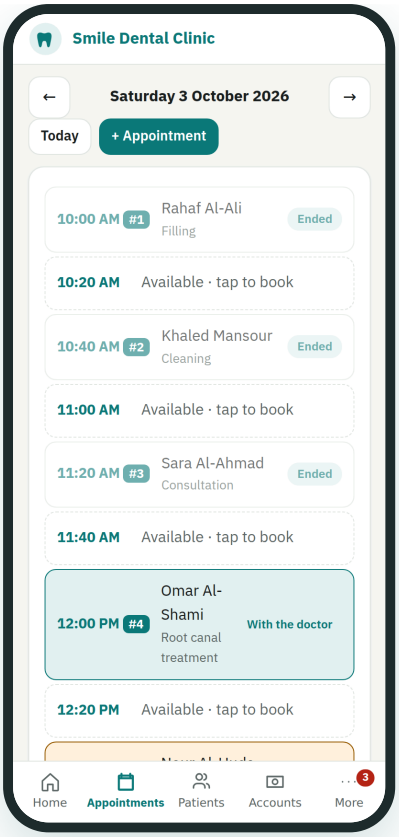

Booking an appointment

1. **From “Appointments” or the patient file tap “+ Appointment”**
2. **Choose the patient, appointment type and doctor (if there is more than one)**
   Appointment types are the clinic's services; dental clinics also get “Crown” and “Implant” automatically, plus an “Other” option to type any other type.
3. **Choose the day, then a free time**
   Booked times are hidden, so there are no clashes.
4. **Notify the patient**
   A ready-made confirmation message opens in WhatsApp.

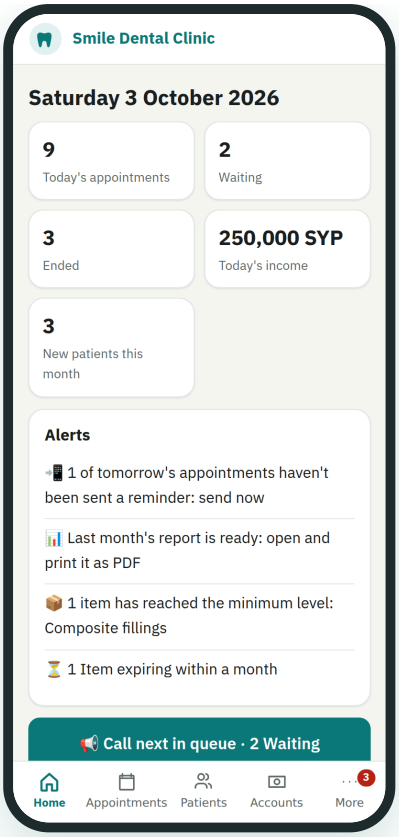

Appointment statuses

- **Confirmed** (the patient can confirm from the app) → **Arrived** (queue number) → **In** → **Done**.
- Or **No-show**, **Cancelled**, or **Rescheduled** to another time.
- **List or grid** (days × times), daily, weekly or monthly, plus “All doctors” in centers. To move an appointment: long-press the name or drag it with the mouse.
- When finished: record a visit and a payment, and the service’s supplies are deducted from inventory automatically.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Appointment schedule

"Arrived" button and calling the queue

Queue and waiting-room screen

1. **When the patient arrives tap "Arrived ✓" next to the appointment**
   Or the patient scans the QR code on the door, gets a queue number and sees how many are ahead.

2. **On the TV**
   Log in with a clinic staff account, then "More → Waiting-room screen → Run on TV". A phone, Android TV or computer can be used.

3. **From the receptionist's phone**
   Tap "📢 Call next in queue" on the home screen; the number changes on the screen instantly with a chime.

The screen also works with a remote: any button shows "Call next in queue", and OK calls it. The screen stays on throughout working hours.

In medical centers: each doctor has a queue letter (A1, A2... B1, B2...), so numbers never repeat. Each appointment shows the doctor and specialty in their own color. When calling, pick the doctor; the TV shows each doctor's current number.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

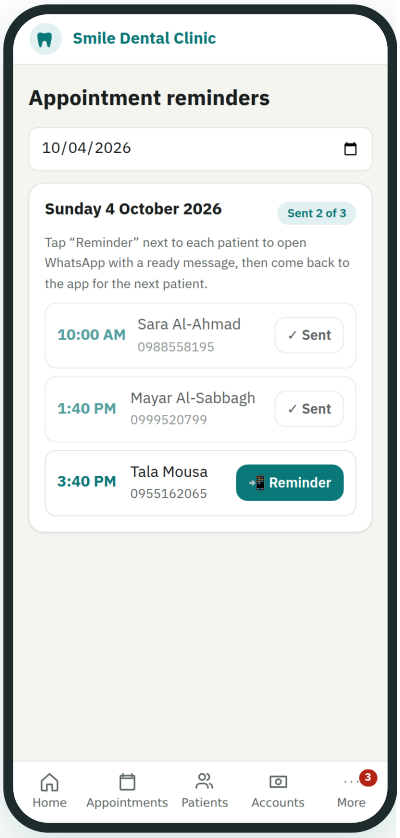

Waiting-room screen on a TV

Appointment requests and tomorrow's reminders

- **Appointment requests:** arrive from the patient app or the public booking page. The receptionist confirms with one tap, or declines with a ready message.
- **Urgent cases:** a list of urgent patients asking for the earliest available appointment; the first is called when any appointment is cancelled or time frees up.
- **Tomorrow's reminders:** from "More → Tomorrow's reminders" you see tomorrow's appointments; next to each patient: WhatsApp or SMS with a ready message, or "App" to send a phone notification. "✓ Sent" appears after sending, and the home page warns if any appointments were not reminded.

> Regular reminders the day before the appointment clearly reduce no-shows.

Tomorrow's appointment reminders

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 7

Visits, prescriptions and medical documents

Everything the doctor writes is saved in the patient file and printed with the clinic's name and logo. The screens are designed to be faster than pen and paper.

Log a visit

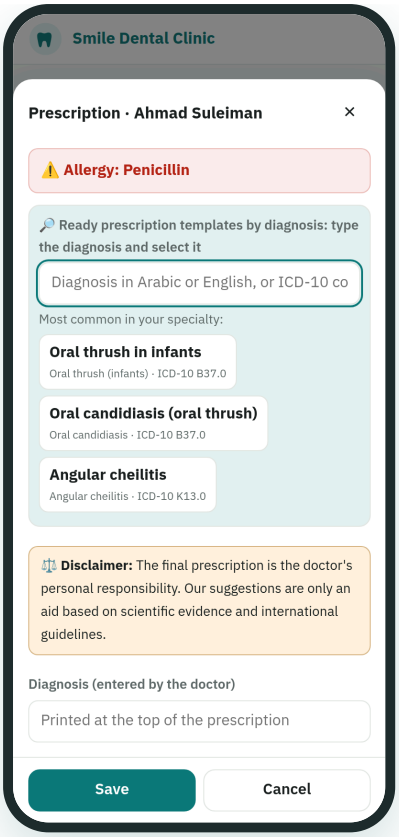

Complaint, examination, diagnosis, treatment, a note visible to the patient, and a private note for doctors only. You can mark the appointment as “Completed” from the same screen, and you will then be offered to write a prescription.

> **Voice dictation:** the microphone button beside the fields types what you say, instead of typing by hand.

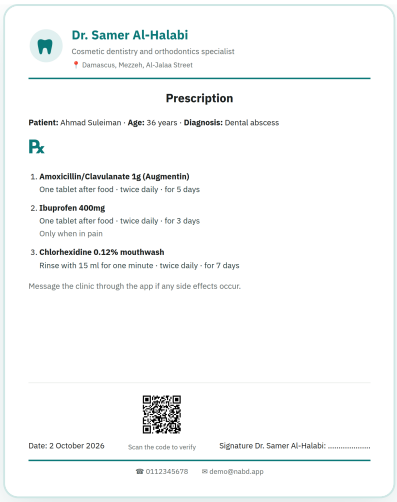

Writing a prescription quickly

- **Smart drug search:** accepts the generic name or a common brand name (e.g. Augmentin, Brufen or Panadol) and converts it to the generic name; on selection the suggested dose, times and duration fill in automatically, and the doctor edits them.
- **Times per day:** quick buttons (once, twice, 3 times, 4 times, as needed). The prescription prints the number of times, and the patient chooses the times that suit their meals.
- **Ready templates:** suggested by specialty and clinical condition per the latest international guidelines (after extraction, dental abscess, fever and cold…); doctors can also save and delete their own.
- **Patient reminders:** the patient picks dose times in the app and gets a reminder for each dose; the number of reminders follows the pills in the box (e.g. Cap. N. 15 three times daily = 15 reminders).
- **Form and quantity to dispense:** calculated automatically beside each drug, e.g. **Cap. N. 15** (15 capsules) or **Syr. N. 1** (one bottle of syrup), and can be edited.
- **The printed prescription:** the patient's name, age and diagnosis at the top, then drug names left to right, with the dose, times per day and duration under each drug, and the date at the bottom.
- **QR verification code:** the pharmacy scans it to confirm the prescription was genuinely issued by the clinic.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Writing a prescription

The printed prescription

> **Disclaimer:** The final prescription is the doctor's personal responsibility. Our suggestions are only an aid based on scientific evidence and international guidelines. This notice is always shown to the doctor in the prescription window.

> **Newly qualified doctor? Don’t worry.** The app includes ready prescriptions for the most common conditions, based on the latest international treatment and prescribing guidelines. Search for any condition and its prescription appears ready to use.

Ready prescription templates by diagnosis, per the latest international protocols and guidelines

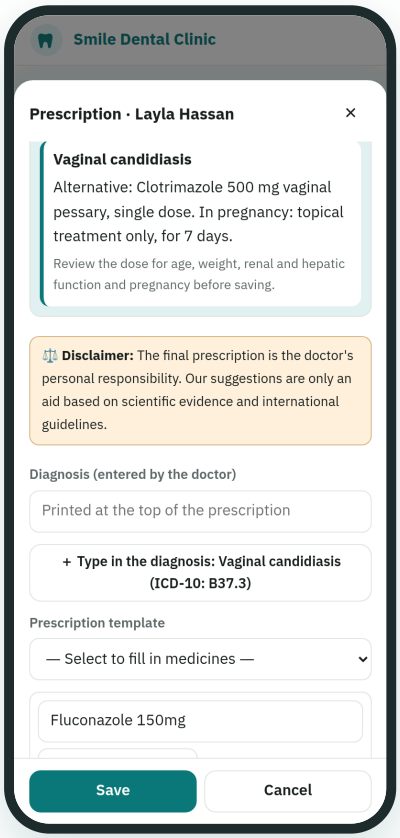

The prescription window has a search box: type the condition (e.g. oral thrush, otitis, H. pylori) and tap it, and the template appears with drugs, doses and duration. The doctor writes the diagnosis, and can add the condition name with its ICD-10 code to the diagnosis field in one tap, editing everything before saving.

- **More than 80 common conditions** in dentistry, internal medicine, pediatrics, gynecology, dermatology, ophthalmology, ENT, urology and orthopedics.
- **Dental examples:** oral candidiasis (oral thrush), angular cheilitis, neonatal oral thrush, dental abscess, pericoronitis, dry socket, aphthous ulcers, herpes labialis.

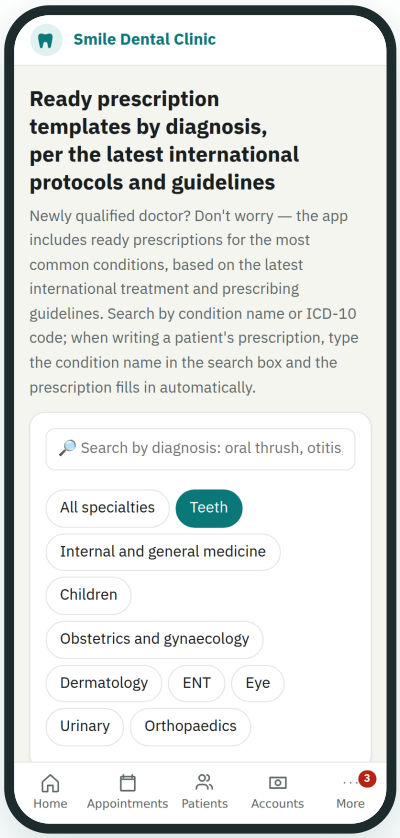

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

- **A tip with every condition:** alternatives for allergy, considerations in pregnancy and children, and non-drug measures.
- **ICD-10 coding:** every condition with its code from the WHO International Classification of Diseases; the code can be printed with the diagnosis on the prescription.
- **Search by diagnosis:** by Arabic or English name or ICD-10 code, with your specialty's conditions first.
- **A full library to browse:** “More → Ready prescription templates by diagnosis”, filterable by specialty.

> Prescription templates and the drug safety guide **are shown to the doctor only**; staff and patients don't see them.

Searching by condition in the prescription

Prescription templates by diagnosis

Drug safety guide

A separate page outside the prescription that the doctor reviews before writing: “More → Drug safety guide”. It lists common drugs allowed and avoided in four situations:

🤰 Pregnancy · 🍼 Breastfeeding · 🟤 Liver disease · 🫘 Kidney disease

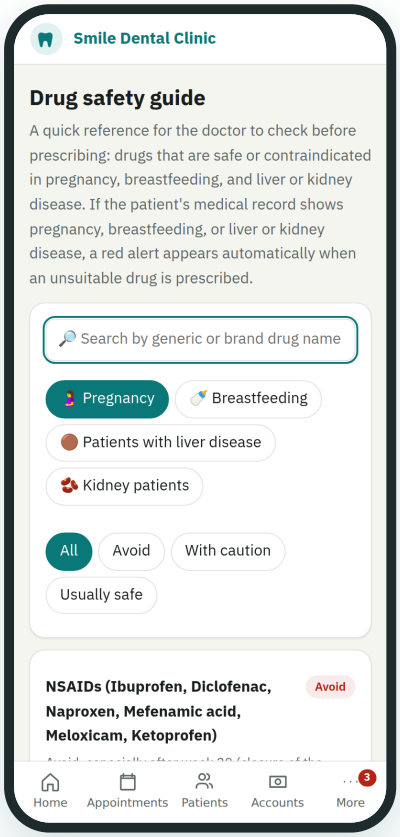

Each drug is rated: **Generally safe**, **Caution / dose adjustment**, or **Avoid**, with a short reason, and search by drug name.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

⚠ Automatic red alert

The patient's medical record has fields: pregnant, breastfeeding, liver disease, kidney disease. If the patient is pregnant (or has an open pregnancy in the pregnancy module) and the doctor writes a drug to avoid in pregnancy, **a red warning appears under it** instantly. The same happens for a drug the patient is allergic to, and saving asks for extra confirmation.

> **Disclaimer:** information in prescriptions and the drug safety guide is an aid based on scientific evidence and international guidelines; the final prescription is the doctor's personal responsibility.

Drug safety guide

Alert for a drug contraindicated in pregnancy

Ready medical documents

The "📄 **Medical note**" button in the patient file prepares, with the clinic's name and logo:

- **Sick leave:** start date, number of days and the addressee.
- **Medical report:** addressed to a recipient, with text pre-filled from the last visit.
- **Referral letter:** to a doctor or specialty, with the reason for referral and a case summary.

The diagnosis fills in automatically from the last visit, and the wording adapts to the patient's sex.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Tests and imaging request

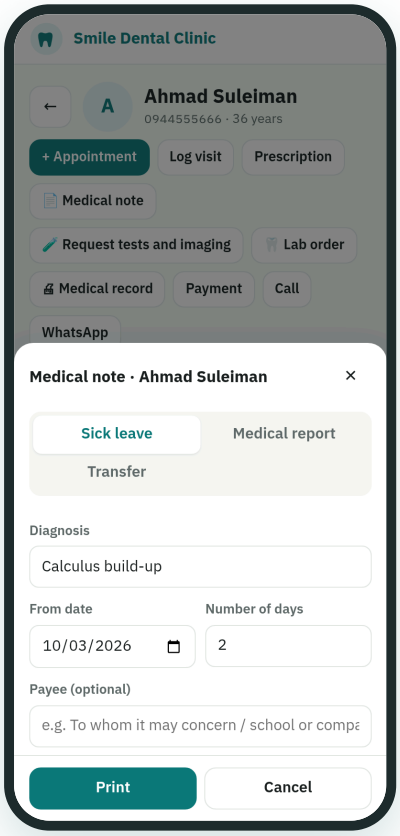

Ready-made lists where you tick the required tests: blood count, glucose, lipids, kidney, liver, hormones, urine and serology, plus dental X-rays, general X-rays and ultrasound, with a field for any other request and a note for the lab. The request can be printed ready for the lab or imaging center.

Medical record PDF

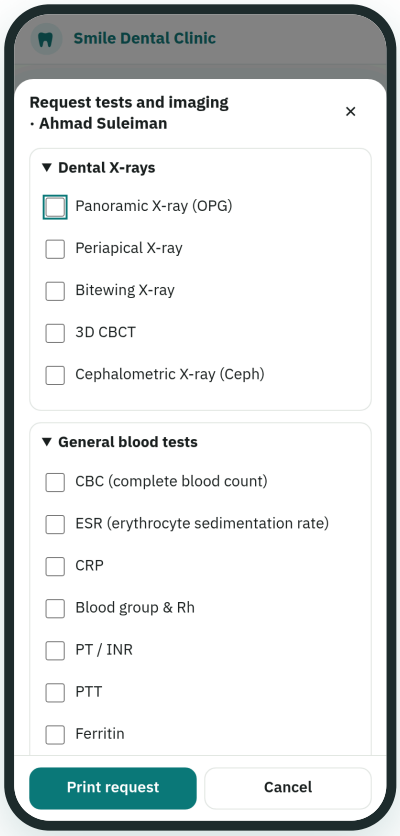

The **“🖨 Medical record”** button prints a full summary: allergies, chronic conditions, current medicines, visits, tests and dental status, without private notes. Useful for travelling or referred patients.

Smart medical assistant

Doctor only, from “More”; strictly medical and with no subscription: **symptoms to diagnosis** with red flags, **drug interactions** (shown automatically in the prescription), **lab interpretation** and eGFR, and a **smart summary** at the top of the patient file.

Medical documents

Lab and imaging request

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

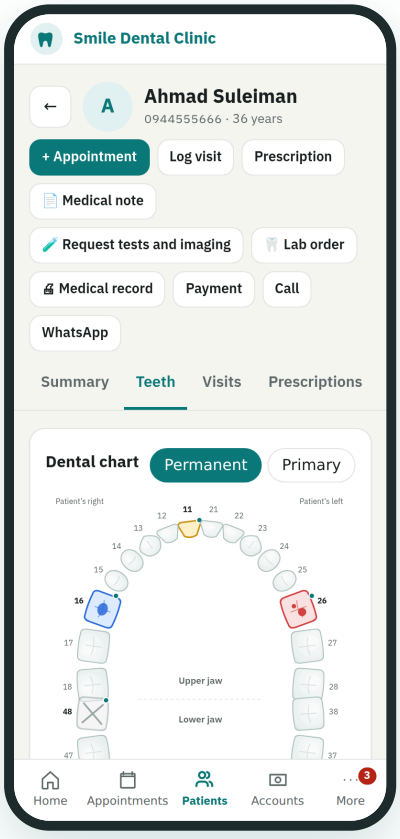

Chapter 8

Specialty modules

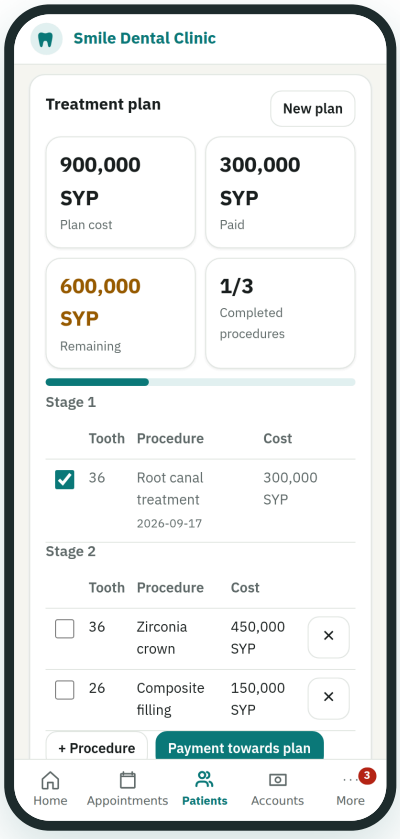

The right module appears in the patient file according to the clinic's specialty. Here are the main ones.

Dentistry

- **A realistic dental chart** shaped as an arch, for permanent and primary teeth, with FDI numbering.
- Tap any tooth to enlarge it with its **treatment history** and dates, and update its status (caries, filling, root canal, crown, bridge, implant, extraction…) and treated surfaces.
- **Treatment plan:** staged procedures with costs, completion rate, paid and remaining.
- **Payment on the plan**, printing it, and **sending it to the patient** by WhatsApp, SMS or the patient app.
- **Price quote for the patient:** procedures, discount and total, with instalments from 2 to 6 and a payment schedule, quote validity, and a line for the patient's approval.

Dental chart

Treatment plan

Dental lab order

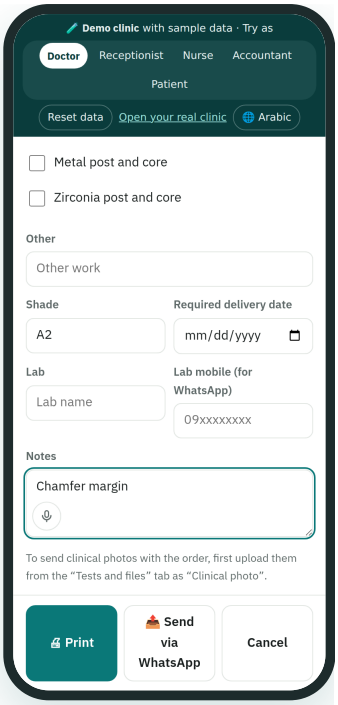

The **“🦷 Lab order”** button in the patient file: a ready form to print or send via WhatsApp.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

- **Dental chart** to select the teeth.
- **Work type:** space maintainer, crown, porcelain, porcelain-fused-to-metal, full zirconia, endocrown, metal post and core, zirconia post and core, or other.
- **Shade**, required delivery date, lab name and notes.
- **Clinical photos** sent with the order in one go.

Before and after clinical photos

From the “Tests and files” tab upload photos as **Clinical photo — before** or **after**. Opening any photo shows a **“📤 Share photo”** button to send it via WhatsApp to the lab or a colleague.

Lab order

Pediatrics

Weight, height and head-circumference charts; a vaccination schedule with administration date and dose number; alerts for due vaccines; and a printable vaccination card.

Obstetrics and gynecology

Pregnancy follow-up with gestational age, due date and visits, high-risk pregnancy alerts, gynecological and infertility history, and cosmetic procedures with before and after photos.

Chronic conditions

Blood pressure, blood sugar, weight and pulse with charts. Patients can enter home readings from their app.

Ophthalmology

Eye exam for both eyes (Sph, Cyl, Axis, Add, IOP) and printing glasses or contact lens prescriptions.

Physiotherapy and orthopedics

Session packages tracking sessions completed, with a pain score for each session.

Dermatology and cosmetics

Sessions and procedures with electronic consent signed by the patient, and before and after photos.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 9

Accounts

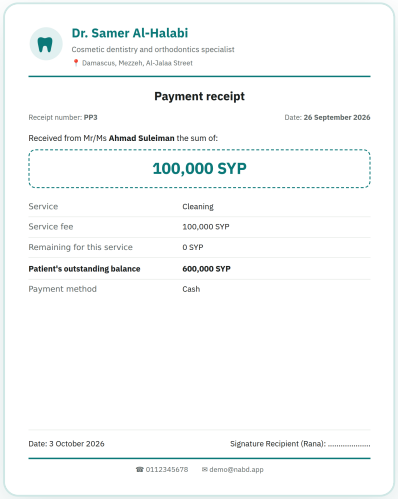

From the first payment to net profit at month end. Every amount is recorded with its payment method and who received it.

Recording a payment and receipt

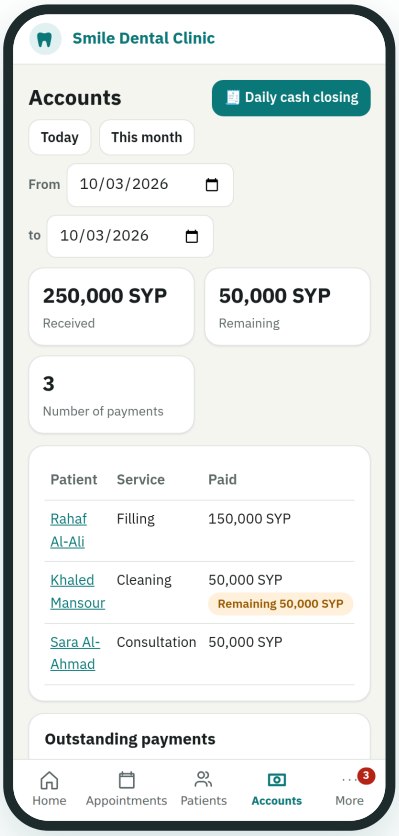

- From the patient file or the appointment tap **“Payment”**: service (fills the price), amount due, amount paid, date, **payment method** (cash, Sham Cash, Syriatel Cash, MTN Cash, bank transfer, card).
- After saving, **print receipt** is offered: receipt number, amount received in large type, service, payment method, and the patient's remaining balance.
- **Settling the balance:** from the Accounts tab in the patient file, with a receipt.

Accounts page

For reception: today's payments. For the doctor and accountant: any period, with received and remaining amounts and the outstanding payments list.

Payment receipt

Accounts page

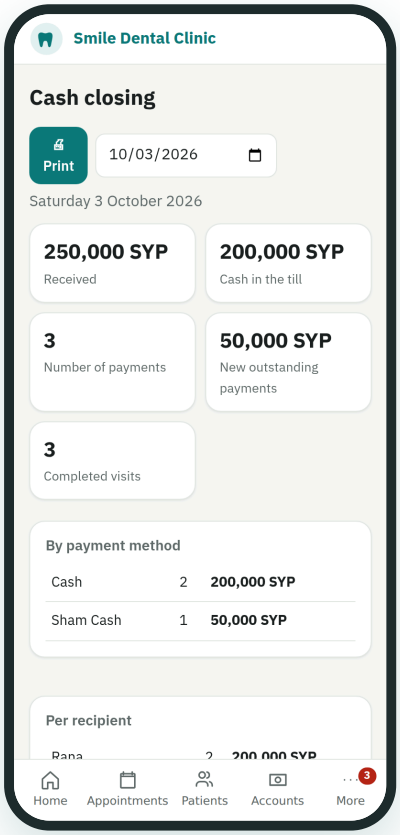

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Daily cash closing

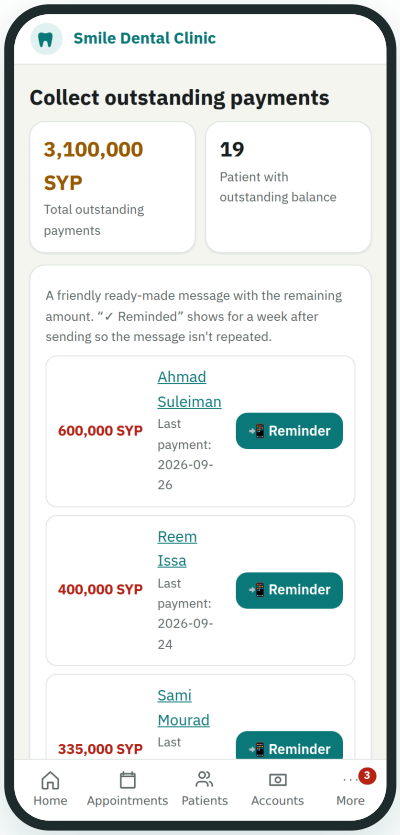

- Received today, and **cash in the drawer** to compare with the till.
- Breakdown by payment method and by the staff member who received it.
- New outstanding payments and the number of completed visits.
- Details of each payment with its time, and a printout with a line for the amount handed over and a signature.

Collecting outstanding payments

A list of every patient with an outstanding balance, largest first, with a friendly message showing the amount via WhatsApp, SMS or the app. “✓ Reminded” shows for a week so the message isn’t repeated.

Cash closing

Collecting outstanding payments

Clinic expenses and net profit

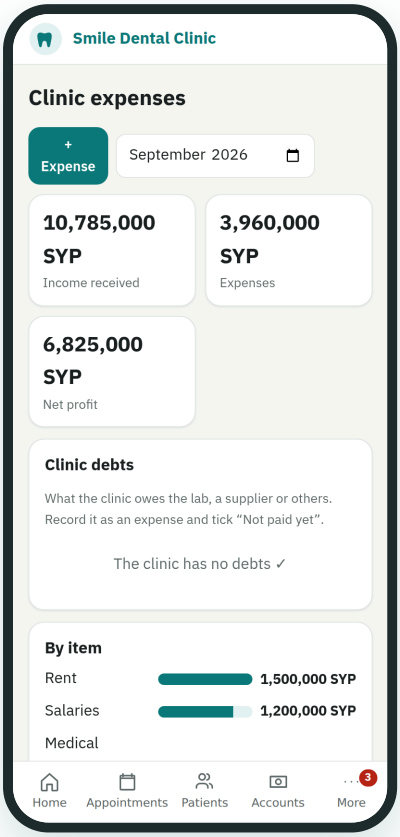

Doctor and accountant only. Record rent, salaries, supplies, bills, maintenance, marketing and taxes, and **net profit** = income received − expenses appears, with expenses broken down by category. No expense is deleted; it is voided and stays visible struck through.

Clinic debts: what the clinic owes the lab or a supplier. Record it as an expense with “Not paid yet” and it appears in the “Clinic debts” list with its total; when paid, tap “Paid” and it joins today's expenses.

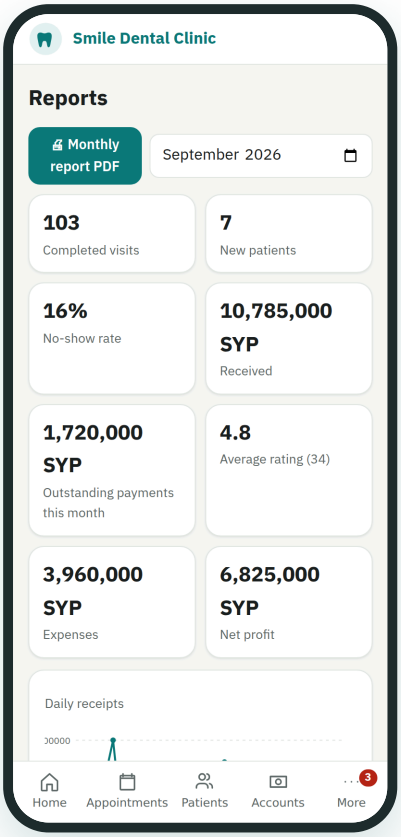

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Reports

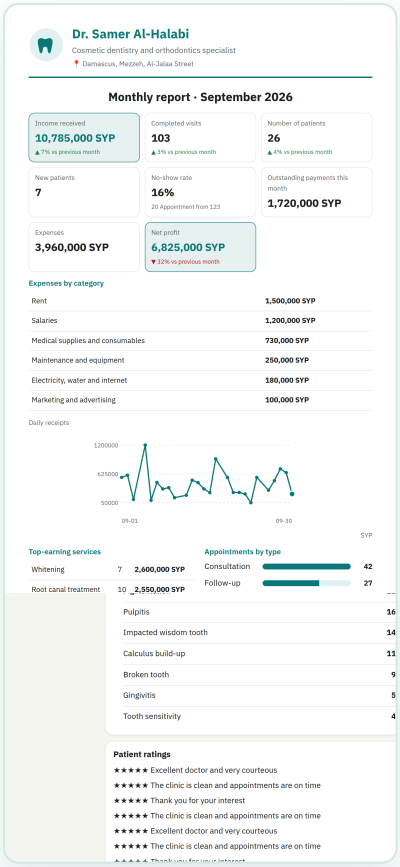

- Completed visits, new patients, no-show rate, amount received, outstanding payments for the month, average patient rating, expenses and net profit.
- Charts of daily income, appointments by type, top diagnoses, each doctor's performance, and patient comments.

Clinic expenses

Reports

Monthly report PDF

Monthly report PDF

The **"🖨 Monthly report PDF"** button on the reports page prepares a tidy report with the clinic's name and logo:

- A notice shows when it's ready at the start of each month.
- Income, visits and patient numbers, with the **change from the previous month** (for the current month: compared with the same period of the previous month).
- Expenses and net profit, and top-earning services.
- Daily income chart, and appointments by type and by doctor.

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 10

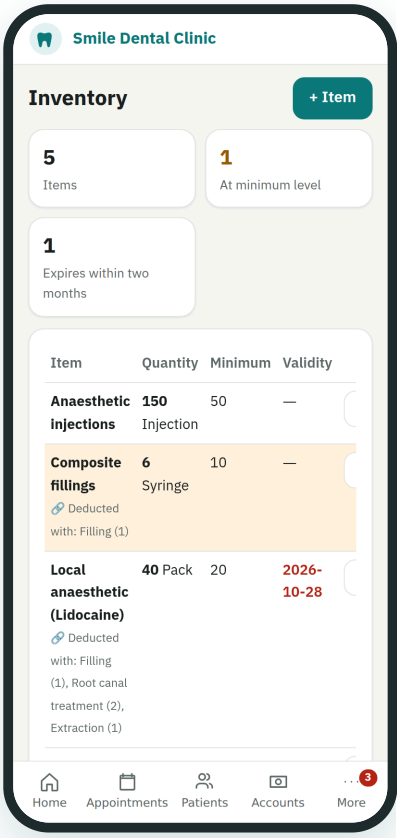

Inventory

Track supplies and medicines in the clinic, with alerts before running out and before expiry (Professional plan and above).

- **Items:** name, quantity, unit, minimum alert level, expiry date, purchase price.
- **Movements:** stock in, stock out or stock-take, with the reason and user name, and a log of recent movements.
- **Alerts:** on the home screen when the minimum level is reached or expiry is within a month.

Automatic deduction with services

When editing any item, set the quantity used per service (for example: filling → one anesthetic ampoule). When an appointment is marked “Completed”, the quantity is deducted automatically and an “Automatic” movement is recorded, and an instant alert appears if the item reaches its minimum level.

Inventory

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 11

Patient app

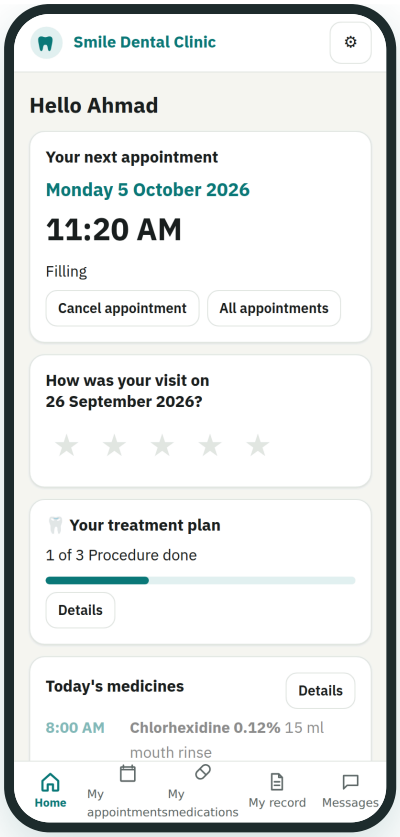

Every patient gets an account in the Nabd app with the clinic or center they visited, to follow their health and contact the clinic without repeated calls.

- **Home:** the next appointment (with the option to cancel it), today's medications with their times, post-procedure instructions, and a star rating for the visit.
- **My appointments:** upcoming and past, and **request an appointment** with a preferred day and time.
- **My medicines:** current medicines and times per day, with a **"Choose my times"** button so the patient sets dose times around meals and sleep, plus previous prescriptions.
- **My file:** visits, tests, files, treatment plan, paid and remaining, with uploading of test photos.
- **Messages:** direct chat with the clinic.
- **Electronic consent:** reading and signing the consent text for a procedure.
- **Health information:** short articles for the clinic's specialty.
- **Privacy:** option to hide medical details from the home screen.

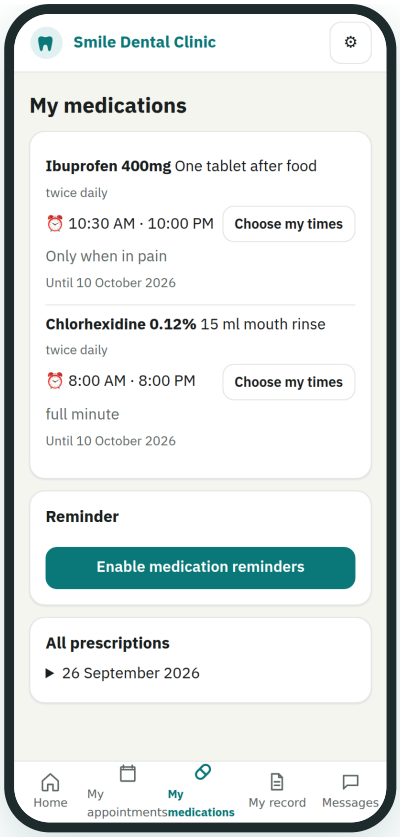

Automatic reminders

After enabling notifications (the "🔔 Enable reminders" button), the patient gets an alert **for every dose** at the chosen times, **the evening before** the appointment, **on the morning** of it, and **two hours before**, even with the app closed. If the clinic changes or cancels the appointment, reminders update automatically.

Home

My medicines

Doctor directory and booking page

From the platform's home page anyone taps **“Are you a patient?”** to find a doctor by specialty and city, and opens the clinic page to book, call or message on WhatsApp. The booking request reaches the clinic for confirmation.

Public booking page

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

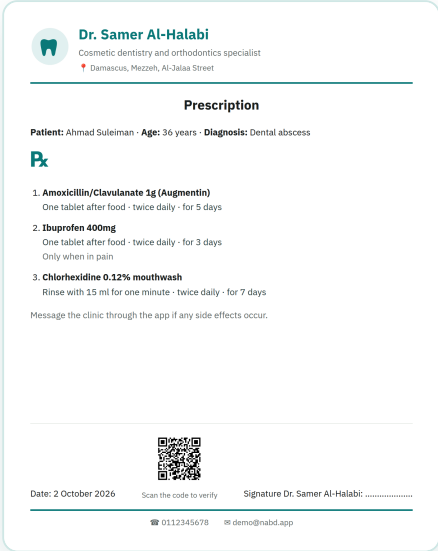

Chapter 12

Printing and documents

Every document from Nabd carries the clinic's identity and can be printed on a full or half page, or saved as PDF and shared.

Letterhead and footer

- **Page header:** logo, doctor's name, specialty and address.
- **Page footer:** date, signature and QR code (for prescriptions), then a line in the clinic colour with the phone and email below it.
- The footer always stays at the bottom of the page, however long the content.

Prescription with the clinic's name and logo

Paper size

The print screen has two buttons: **“Full A4”** and **“Half A4”**. Choosing half shrinks fonts, logo and code to fit, and the device remembers your choice.

What can be printed

- Prescription
- Visit report
- Payment receipt
- Sick leave
- Medical report
- Referral letter
- Tests and imaging request
- Patient file
- Dental treatment plan
- Price quote
- Vaccination card
- Glasses prescription
- Pregnancy follow-up report
- Cash closing
- Monthly report

© 2026 Nabd · All rights reserved · mohamedfayzyasenalsabagh@gmail.com

Chapter 13

Security, privacy and administration

Medical data is a trust. Nabd is designed to protect it with strict rules on the server, not just on screen.

Complete isolation between clinics

No clinic can see another clinic's data, even for the same patient.

Server-side permissions

Reception cannot see any medical data, private notes are for doctors only, and patients see only their own file.

No permanent deletion

No medical or financial record is deleted; it is archived or voided and stays visible.

Audit log

Every action is recorded with who did it and when, visible to the lead doctor.

Backup

From “More → Backup” download a file with all clinic data. A weekly backup is recommended.

Account protection

Temporary passwords that change at first sign-in, and instant suspension of any account when needed.

Works offline

The app opens without internet and work continues; changes sync as soon as the connection returns.

Dark mode

Light, dark or automatic appearance following the phone, for eye comfort.

Chapter 14

Plans and subscription

Every clinic starts with a full free trial for 14 days, then chooses the right plan.

Basic

$15 per month

- One doctor and one staff member
- Appointments and medical records
- Patient app and reminders
- Specialty module
- Accounts and reports

Professional

$30 per month

- Up to 3 doctors and 3 staff
- Public booking page
- Inventory and automatic deduction
- Prescription with QR code
- All Basic features

Medical centers

$60 per month

- Practically unlimited doctors and staff
- Several specialties in one center
- All Professional features
- Dedicated support

1. **From “More → Subscription & invoices” choose the plan and period**
   One month, 3 months, 6 months or a year (yearly subscriptions get a discount on some plans).
2. **Pay**
   Via Sham Cash (scan the QR code), Syriatel Cash or the methods available on the page.
3. **Upload the receipt photo or enter the transaction number**
   The payment is reviewed and the subscription activated, showing the new expiry date.

When the subscription expires, the clinic becomes **read-only**: all data is kept in full, and editing resumes as soon as you renew. Nothing is deleted.

Chapter 15

FAQ

Quick answers to the most common questions. These questions are also inside the app under “More → Help → FAQ” and on the Nabd home page, and this guide can be downloaded from the app itself.

I’m a newly qualified doctor. Will the app help me?

Yes. It includes ready prescriptions for the most common conditions based on the latest international treatment and drug protocols, with diagnosis search and a drug safety guide. The final prescription remains the doctor's personal responsibility; the suggestions are an aid based on scientific evidence and international guidelines.

Is the app built on international medical standards?

Yes. Diagnoses are coded with the WHO ICD-10 International Classification of Diseases, drugs use their international generic names, the ready prescriptions follow WHO, NICE, CDC, AAP, ACOG and other protocols, teeth use the international FDI numbering, and data is stored encrypted on Google Cloud servers.

Does the patient need to download the app?

No. The clinic works fully without the patient app, and reminders can be sent by WhatsApp from the receptionist. The app is an extra for the patient.

Do I need a computer?

No. Nabd works fully from a phone; a computer just gives a wider screen.

What if the internet goes down?

The app opens and work continues, with a “No internet” bar. Changes are saved on the device and sync as soon as the connection returns.

Can staff see patients' medical data?

Reception and the accountant see no medical data. The nurse sees the medical record view-only, without private notes. Prescription templates and the drug safety guide are for the doctor only.

How do I set up the waiting-room screen?

On the TV, log in with a staff account, then “More → Waiting-room screen → Run on TV”. Calls are made from the receptionist's phone.

A patient forgot their password — what do I do?

From the patient card → Account → New password, and send it to them on WhatsApp.

Can I add a second doctor?

Yes, in the Professional plan (up to 3 doctors) or Medical centers, from “More → Team”.

Can I move my data?

Yes, a file with all data can be downloaded from Backup at any time.

What happens when the subscription expires?

All data stays saved and becomes read-only until renewal.

How can I try before subscribing?

With the demo clinic, no sign-up needed, or the 14-day free trial with all features.

Chapter 16

Quick start: your clinic ready in one day

An ordered checklist you complete once at the start, so the clinic runs fully from day one. Tick each step when done.

1. ☐ **Create the clinic and log in with the lead doctor account**
   From “Register your clinic” on the website, or try the demo clinic first.
2. ☐ **Complete the clinic settings**
   Logo, clinic and doctor name and title, address, phone and email, interface colour and interface language.
3. ☐ **Set working hours and appointment length**
   For each day of the week, so no booking is accepted outside them.
4. ☐ **Add services and prices**
   Consultation, follow-up, filling, crown, implant… so the price fills in automatically at payment.
5. ☐ **Add your team**
   Reception, nurse, accountant and doctors, and send each their temporary password on WhatsApp.
6. ☐ **Register your first patient and book them an appointment**
   They receive the welcome message with the app link and password.
7. ☐ **Write and print your first prescription**
   Try searching by diagnosis, and save your frequent prescriptions as templates.
8. ☐ **Run the waiting-room screen on the TV**
   From “More → Waiting-room screen” on the TV, with calls from the receptionist's phone.
9. ☐ **Enable the booking page and share its link**
   On WhatsApp and social media, and print the QR code to hang in the clinic.
10. ☐ **Download your first backup**
    From “More → Backup”, and repeat it every month.

Chapter 17

Tips for a successful clinic with Nabd

Simple habits of Nabd's most successful users that save time, reduce no-shows and increase patient satisfaction.

Remind tomorrow’s patients every evening

A ready message in one tap (WhatsApp, SMS or an app notification) cuts no-shows.

Save your frequent prescriptions

Turn every prescription you write often into a clearly named template.

Complete the medical record from the first visit

Allergies, chronic conditions, pregnancy and breastfeeding, so the red alerts work automatically.

Record every payment immediately

And close the cash drawer at the end of the day, so accounts stay accurate without month-end effort.

Read the monthly report

Top-earning services, busy days and no-show rate, to decide by the numbers.

Set a minimum level for each item

So you're alerted before it runs out, and supplies are deducted automatically with every session.

Encourage patients to use the app

They see their appointments, medicines and their live turn, and get a reminder for every dose, so they call the clinic less.

Give each staff member only their role

And disable the account of anyone who leaves immediately from the Team page.

Need help? Contact us on WhatsApp any time, and we'll help you set up your clinic and move your old data.
